

The digital generation of police interview recorders, data management, storage, analysis and retrieval

Digital Interview Recording Scalable Deployment Options

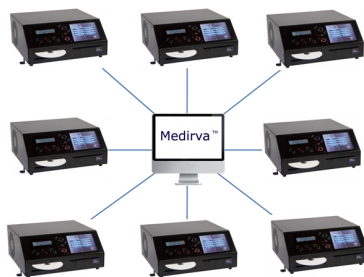

A Standalone
Solution

The Challenge

The high quality capture of police interviews is crucial in securing convictions. With thousands of hours of new and archive interview data available, there is a need to store, manage and share this data within and between Police Forces.

A Force
Repository

Our Solution

An entirely scalable recording capability comprising our digital AudioPC recorder and Repository software

AudioPC - IR a new generation of digital audio and video interview recorders:

- Proven evidential standard recording
- Records to CD or server or both

Medirva® - Data management, analysis and replay software

- Browser based data retrieval
- Powerful analysis tool

Regional & National
Capability
